Lower risk — Higher risk

1	2	3	4	5	6	7

Typically lower rewards — Typically higher rewards

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. For full details of risks, please refer to the risk section in the Prospectus and KIID.

GENERAL INFORMATION

PERFORMANCE INDICATOR: Cash +1% to +3% over a minimum 3 years (USD: 3M SOFR / GBP: 3M SONIA)**

APPROPRIATE TERM: Minimum 3 years

MORNINGSTAR CATEGORY: 50/50 average of the Morningstar Moderate Allocation USD and Morningstar Cautious Allocation USD

INVESTMENT MANAGER: Nedgroup Investments (IOM) Limited; licensed by the Isle of Man Financial Services Authority.

An Isle of Man based fund manager providing investment management services to assets in excess of USD 5bn.

FUND OBJECTIVE

The Balanced MultiFund aims to provide moderate levels of growth with moderate levels of risk and volatility over the medium to longer-term.

The Sub-Fund is actively managed and is not managed in reference to any benchmark. It is managed by reference to a performance target which is to outperform USD 3M SOFR +1% to 3% over a minimum three years.

SUITABILITY & RISK AND REWARD

The Balanced MultiFund is suitable for clients with an investment time horizon of a minimum 3 years. Investing in the fund involves a risk to capital in order to achieve the desired return.

To achieve the investment objective, the portfolio invests across a range of asset classes within a strategic and tactical asset allocation framework designed to maximise diversification benefits. An absolute and relative valuation-based approach underpins this framework, resulting in a multilayered process to facilitate disciplined decision-making and risk management.

Portfolio construction combines exposures to active fund managers, who are expected to outperform their defined benchmarks and passive investment vehicles which provide low cost access to markets. This blend of active and passive funds is used to create a competitively priced investment solution.

Class A performance net of fees as of 28 March 2024. * Since inception annualised.

USD peer group is a 50/50 average of the Morningstar Moderate Allocation USD and Morningstar Cautious Allocation USD . The GBP is simulated performance based on the same competitor universe and returns are used as for the USD data, although a 65% hedge to sterling is applied net of fees, as per the fund's GBP share class. Past performance is not a guide to future returns.

For full details on fees and charges, please see the Prospectus and Supplement.

**Cash performance indicators calculated using USD and GBP LIBID 3 month figures to 31st January 2022. From 1st February transitioned to using 3mo SOFR for USD and 3mo SONIA for GBP.

1) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax. Data source Nedgroup Investments (IOM) Limited.

2) The on-going fee is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The on-going fee shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12-month period as at the date shown. The current on-going fee cannot be used as an indication of future on-going fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return.

KEY RISKS

- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- The Fund invests in other funds (including exchange traded funds and investment trusts/companies), which may introduce more risky assets, derivative usage and other risks, as well as contributing to a higher level of ongoing charges.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

March 2024

MARKET COMMENTARY

The first quarter of 2024 proved to be a strong one for risk assets, with several major equity indices reaching record highs as continued excitement around artificial intelligence (AI) and growing hopes for a soft landing played a significant role in steering market dynamics. The "Magnificent 7", a group of technology and AI-related stocks, were up over 17% during the quarter, helping the S&P 500 reach a new all-time high, whilst robust economic growth and unemployment data also supported market optimism. Positive economic developments were also not solely isolated to the US, with the Euro area defying market expectation by sidestepping a technical recession in Q4 and subsequently releasing a number of data points that suggested an improvement in economic momentum.

Naturally, economic robustness was met with central bank resolve as key officials decided to hold rates steady, whilst also signalling that imminent rate cuts were unlikely. This, alongside hotter-than-expected inflation readings forced some investors to reduce the number of cuts expected this year. The result having negative implications for the bond market, where climbing yields led to some capital loss. Staying on rates, and whilst most countries in the west are deciding on when best to cut rates, March saw a significant milestone in Japan as the Bank of Japan ended their negative interest rate policy, raising the base rate for the first time in 17 years.

Unfortunately, the start of 2024 also saw a continuation of the geopolitical concerns that punctuated much of last year, with the Houthi rebels launching attacks on commercial shipping in the Red Sea which resulted in the US and UK conducting retaliatory air strikes. Furthermore, towards the end of January, a drone attack claimed the lives of three U.S. troops in Jordan, heightening concerns about a broader escalation in the region which were present through much of the first quarter.

Given this backdrop, overall it was a very good quarter for market returns. Global equities increased by +9.4%, with Japanese (+18.6%) and US equities (+10.4%) the best performing areas, helped by the strong performance of technology stocks. Europe ex UK (+8.3%) also performed well, whilst the UK (+4.0%) and Emerging markets (+4.2%) lagged the broader market. In terms of equity styles, growth stocks (+9.5%) outperformed value (+7.0%), and small-cap stocks (+3.9%) underperformed large caps (9.4%), essentially because interest rate expectations increased. This was reflected in sector performance, with Information Technology (+12.0%) and Communication Services (+11.2%) the strongest two sectors, whilst Materials (+1.9%), Utilities (+1.7%) and Real Estate (-1.6%) lagged significantly.

Fixed income markets were more mixed, with clear dispersion between government bonds and lower quality credit. Looking at the detail, global government bonds (+0.2%) and Global Investment grade credit (+0.2%) finished the quarter flat, lagging the riskier areas as the strong rally in equities helped spreads to tighten. This was seen in global emerging market debt (+1.4%) and especially global high yield (+2.0%).

In the real assets space, both global real estate (-1.4%) and global infrastructure (+1.4%) lagged the broader equity market, reflecting their sensitivity to rising interest rate expectations. Commodities were strong over the quarter with Crude Oil (+17.7%) and Gold (+7.4%) rallying in part due to the ongoing geopolitical tensions in the Middle East.

PORTFOLIO COMMENTARY

The first quarter of 2024 saw the Balanced MultiFund rise by +0.9% in the US Dollar share class, and +1.2% in the GBP share class. The difference representing dollar strength over the period.

During Q1 2024, resilient economic data boosted investor sentiment, resulting in positive returns across all our equity funds. Our strongest performers were our regional exposures in the US and Japan. The iShares Core S&P 500 ETF (+10.1%) continued to benefit from the rally seen in AI-related stocks, while the iShares Core MSCI Japan IMI ETF (+9.8%) showed strong growth even after the Bank of Japan moved away from negative interest rates. Our quality-focused managers, Fundsmith Equity Fund (+8.40) and Nedgroup Global Equity Fund (+8.2%), also performed strongly. On the other hand, our more cyclical managers, TT Emerging Markets Equity Fund (+6.0%), slightly lagged due to its bias toward EM stocks, which fell behind as investors remained concerned about China's growth prospects in the absence of any meaningful fiscal stimulus.

Fixed income positions were relatively subdued over the quarter, with the shorter-duration iShares Treasury Bond 1-3yr ETF (+0.3%) outperforming the longer-duration iShares Treasury Bond 7-10yr ETF (-1.3%), as increased pressures from rising yields emerged due to investors dialling back the likelihood of rate cuts. Strong economic data supported our credit funds as spreads tightened, and once again, holdings less sensitive to interest rate rises, such as those with lower durations, including the Lord Abbett Short Duration Income Fund (+0.9%) and PIMCO Low Duration Global IG Credit (+0.7%), outperformed the longer-maturity PIMCO Global IG Credit (+0.4%)

Elsewhere, there was a wide range of performances within our real asset space. Within property, our listed global REITs holding, Nedgroup Global Property Fund (-0.4%), lagged due to higher interest rates, while Balanced Commercial Property (+14.3%) experienced a strong rise in sentiment following sales of its office holdings. This move aligns with the company's ongoing commitment to reshaping the portfolio away from structurally challenged areas to those supported by growth, such as industrial & logistics and retail warehousing. Conversely, our more defensive holdings in UK care homes, Impact Healthcare REIT (-4.7%), and Target Healthcare REIT (-0.7%), lagged despite posting a strong set of earnings results, including inflation-linked rental uplifts. Empiric Student Property (+0.2%) managed to buck the negative trend due to good earnings results driven by strong rental growth. Occupancy levels and bookings for the next academic year were also pleasing. Our Renewable energy holdings faced challenges, with Greencoat UK Wind (-5.7%), Greencoat Renewables (-14.3%), JLEN Environmental Assets Group (-6.1%), and The Renewable Infrastructure Group (-9.8%) declining following NAV disappointments due to lower power prices and low wind resources. Meanwhile, our traditional infrastructure player, 3i Infrastructure (+1.6%) displayed resilience, as did our position in Gold, via WisdomTree Core Physical Gold ETC (+7.3%).

Within our alternative positions, GCP Asset Backed Income (+6.0%) saw a boost from early loan repayments, paving the way for reducing net debt and launching a share buyback program. The performance of our private equity holdings, Oakley Capital Investments (-4.4%) and Princess Private Equity (+2.2%) diverged, while our song royalties position, Hipgnosis Songs Fund (-4.1%) saw a decline. Finally, returns for our three energy efficiency holdings were disappointing with SDCL Energy Efficiency (-6.9%) and Gore Street Energy Storage Fund (-24.7%). Gresham House Energy Storage Fund (-61.7%) was particularly weak due to the softer revenue environment resulting from decreased battery storage utilisation in the UK's electricity grid. We however remain confident in management's plan, foresee regulatory interventions to address the situation, and believe that over the long term, energy storage will be a key enabler for carbon neutrality and expect growth to be resilient.

In terms of portfolio activity over the quarter, we invested in the newly launched Nedgroup Global Strategic Bond Fund, which was funded via trims in our short and longer duration investment-grade holdings. The Nedgroup Global Strategic Bond Fund stands out as an actively managed core bond, multi-sector portfolio, rooted in value-based principles, designed to deliver a steady return stream. We also reduced fixed income duration by introducing a new position in the iShares US Treasury 3-7yr, funded by selling the Vanguard US Government Bond Index fund and took opportunities in Emerging Markets local currency by allocating to the Colchester Local Markets Bond Fund. Within equities, we added a new position in US small caps, given the strong fundamentals in the region and attractive pricing point. Finally, within real assets we increased cyclicality via trimming Atlas Global Infrastructure, in favour of Global REITs as they should benefit more as policy loosens.
