Whatever the source of your wealth, there is an opportunity to maximise its potential through our wealth planning service.

## A plan for life

Creating a wealth plan means taking stock of your life. Here's how we can help you.

### Organisation

Putting your financial life in order and ensuring it's working for you.

### Responsibility

Identifying your financial commitments and preparing for them.

### Anticipation

Anticipating life's changes and taking a proactive approach to them.

### Impartiality

Using our experience and insight to take the emotion out of financial decision-making.

### Expertise

Providing specialist advice to make the most of your wealth.

### Partnership

Working with you and your professional advisers to follow your plan and help you achieve your wealth goals.

## What does your wealth mean for you?

Everyone's situation is unique. This is why a personalised wealth plan is important to help you, and your family, define your goals and aspirations. Your plan should reflect these broader goals and the vital role your finances will play in helping you achieve them. It is never too early to make a plan.

### First steps

It all starts with a conversation. You may be thinking about your retirement. You may want to help out your children. You may hope to leave a lasting legacy. Talking with our experienced wealth planning team can help these thoughts take shape and determine your financial goals. We will also spend time with you gathering information on your existing finances, family circumstances, and business interests before we agree the most suitable means to achieve those goals. Thinking through your total wealth will help ensure you achieve the best possible outcomes for you.

### Planning the flow of cash

Most clients we meet have a broad understanding of what their wealth might achieve, but have not gone into the detail. By assessing your current circumstances and a forecast of your future wealth, along with your anticipated income and expenditure, we can use cashflow modelling to help you visualise different scenarios and explore potential options. With a clear picture of your complete wealth, as well as your goals and timelines, you can make provisions for anticipated life events and commitments, and plan your future cashflow.

## Developing your wealth plan

A comprehensive wealth plan will help you meet your current financial needs and prepare you for financial stability in the future. The work involved in creating the plan will help guide how you invest today, along with planning for your future retirement, and influencing your tax and estate planning decisions. Once we have a full understanding of what you want to achieve, our wealth planning team will work closely with you and your private banker to develop a plan for attaining your agreed goals in the most effective way.

Here is how we can help you through each stage of your life:

## Staying on track

Times change and lives change. Once your wealth plan is in place, it is important to review your financial circumstances, ideally every year. Major life events will affect your plan, and your objectives and aspirations may change.

We provide full, ongoing support as your circumstances or financial markets change. We monitor your investment performance and measure progress towards your goals. We will make recommendations and discuss any appropriate action with you, to ensure your plan remains in line with your objectives.

Time is precious, but making the time to regularly review your financial circumstances and future plans provides reassurance that your finances are working for you and on track to achieve your goals.
